Hi Ms.Hams, how have you been? Our male dog turned two this year. He always makes our family happy. Our female dog is 19 months old, but she is bigger than Gaius. My husband is thinking of breeding the dogs to keep their blood line. I sometimes view your Website and see your puppies. They are so cute.

Have a great summer.

Hello,

Was thinking about how much Daisy has grown as her 2 year birthday nears. She is doing great, growing and bring joy to our life's daily. I attached a few pics to see her growth. The pic with my daughter was taken back in March at her yearly checkup. We were praised by the vet for having her in such great shape and not over weight. Daisy is the most active big dog I have ever seen, she loves water and being outside by my side and the speed she has is unbelievable. After a good rain we sit outside and enjoy watching her playing with her ball and the puddles lol

Sincerely,

Here's a couple of pics of Atticus from his trip to doggie day care yesterday. He's a huge hit on the internet right now at Pet's Paradise Instagram. We love this guy! The pics don't do his huge size justice, but they are still awesome.
